THE VARONE HOUSE

Since it was founded in 1900, the Varone family business has followed the major developments in Swiss and Valais winegrowing.

At that time, it was the first to offer its wines in small containers and to distinguish bottle-aged qualities from the more common open wines. This led to the commercial development of Varone wines in the gastronomic sector and among private customers in Switzerland and abroad.

Since its foundation, Varone has worked on these values. In the 2000s, it adopted a strategy of close contact with the consumer, based on an original approach: multi-sensory tasting. The result is extremely precise, uncompromising wines that are offered at tastings where all the senses are brought to life. A different way of seeing, smelling, touching and tasting wine...

Wine tasting engages all our senses and calls on our memory. It invites us to search for smells, tastes and even sensations in our most distant memories to put words to our perceptions.

In 1992, Varone joined forces with Bonvin 1858 Les Domaines to create Les Celliers de Champsec, with the aim of developing synergies and streamlining certain activities.

Le Cube: Winner of the Swiss Heritage Award in 2013, this former sentry box suspended between the sky and the vines has been transformed into a gourmet area. This shady summer stopover is sure to please, thanks to its remarkable location near the Clavau bisse.
